## **ROWE Professional Services Company wins American Concrete Pavement Association awards**

**Flint, Michigan, Oct. 6, 2009** – ROWE Professional Services Company staff won two awards from the American Concrete Pavement Association.

ROWE Professional Services Company provided design engineering, and the coordination of a consulting team for the Michigan Department of Transportation, for a project on I-75 from Birch Run Creek to Bridgeport that won the Divided Highways (Urban) Gold Award. The Gold Award is the highest honor for that category, and the project was judged against hundreds of others across the nation. The project included the reconstruction and widening of both northbound and southbound I-75 to four lanes, including the enclosure of an open median with a concrete barrier section, and Dixie Highway/I-75 interchange ramp upgrades. Interstate Highway Construction, Inc. of Owosso completed the construction of the project.

A project to reconnect Kearsley Street through the University of Michigan-Flint campus won the Municipal Streets and Intersections (less than 30,000 Square Yards) Silver Award. ROWE provided survey, design, landscape architecture, and construction engineering for the project, which re-established the connection between the Flint Cultural Center campus to the U of M-Flint campus and downtown Flint. The road reconnection allows for vehicular, non-motorized and pedestrian access.

Construction for the Kearsley Street reconnection was completed by Angelo lafrate Construction Company of Warren.

The awards will be presented at the American Concrete Pavement Association's national convention banquet Dec. 4 in Orlando, Fla. The organization is the national trade association for the concrete pavement industry, with a primary mission of creating and maintaining a strong national presence through dynamic, strategic leadership; effective technical expertise and resources; and persuasive advocacy on behalf of the industry.

ROWE's headquarters is in Flint, Mich.; additional offices are located in Lapeer, Mt. Pleasant, Grayling, and the tri-cities area in Mich., and Myrtle Beach, SC.

ROWE Professional Services Company is a full service professional consulting firm specializing in civil engineering, surveying, aerial photography/mapping, landscape architecture, planning, and land development services.
