ROWE Professional Services Company I-94 Project Wins Award

Flint, Michigan, Dec. 22, 2011 – The Michigan Concrete Association (MCA) chose ROWE Professional Services Company's I-94 reconstruction/rehabilitation project in Jackson County for an Award of Excellence. This is the fifth Award of Excellence a ROWE project has received from the MCA in the past four years.

ROWE teamed with Interstate Highway Construction, Inc. of Owosso to complete the \$44 million Michigan Department of Transportation project. It was a Design Build project, an innovative construction contracting process that requires the design engineer, contractor, and project owner to work closely during the project's progression. The project included reconstruction/rehabilitation of 9.24 miles of pavement, rehabilitation of one bridge, and reconstruction of two bridges.

The project was one of more than 40 submissions for awards of excellence. It was honored in the divided highways (rural) category and will now proceed to the national awards competition.

The MCA is the state branch of the national trade association for the concrete pavement industry, which has a primary mission of creating and maintaining a strong national presence through dynamic, strategic leadership; effective technical expertise and resources; and persuasive advocacy on behalf of the industry.

ROWE's headquarters is in Flint, Mich.; additional offices are located in Lapeer, Mt. Pleasant, Grayling, and the tri-cities area in Mich., and Myrtle Beach, SC.

ROWE Professional Services Company is a full-service professional consulting firm specializing in civil engineering, surveying, aerial photography/mapping, landscape architecture, planning, and land development services.
