ROWE Professional Services Company wins Michigan Concrete Paving Association award

Flint, Michigan, Jan. 28, 2010 – The Michigan Concrete Paving Association honored ROWE Professional Services Company with an award for design excellence on an I-69 reconstruction project in Lapeer and St. Clair counties.

ROWE Professional Services Company was the lead design consultant for the project, responsible for the preparation of construction plans and specifications for the reconstruction of 6 miles of I-69 from east of Lapeer. Employees worked closely with the contractor, Interstate Highway Construction, Inc. (IHC) of Owosso, to complete the project, which is the first design/build/finance project for the Michigan Department of Transportation. The project cost 10 percent less than the original estimate and was finished a month earlier than anticipated, limiting public user delays.

The Michigan Concrete Paving Association (MCPA) is a 42-year-old statewide professional organization for the concrete pavement industry that represents its members on all matters affecting the industry's relationship with public agencies, the general public, and the industry-at-large.

The association will present ROWE and IHC with plaques at its February 18 awards of excellence ceremony.

The project is now eligible for an American Concrete Pavement Association (ACPA) award, the national association for the concrete industry. ROWE won two ACPA awards in 2009 -- for the reconstruction and widening of I-75 from Birch Run Creek to Bridgeport, and the Kearsley Street Reconnection in Flint.

ROWE's headquarters is in Flint, Mich.; additional offices are located in Lapeer, Mt. Pleasant, Grayling, and the tri-cities area in Mich., and Myrtle Beach, SC.

ROWE Professional Services Company is a full service professional firm specializing in civil engineering, surveying, aerial photography/mapping, landscape architecture, planning, and land development services.
